

Gitesh Goyal

Noida, Uttar Pradesh +91 7428760451 goyalgitesh88@gmail.com linkedin.com/in/gitesh-goyal

SUMMARY

CS undergraduate (CGPA 9.96, IIIT) passionate about building developer communities. Active member of AI-TRONICS Club with hands-on project experience across full-stack (NutriGenAI) and computer vision (VisionSense). Eager to contribute to DSC's technical initiatives by building workshops, demos, and open-source tools for fellow developers.

EDUCATION

Jaypee Institute Of Information Technology

August 2025 – June 2029

Bachelor of Technology in Computer Science | **CGPA 9.96/10.0**

Uttar Pradesh, India

Gyanshree School

2024 – 2025

XII, CBSE | **Grade 96.25%**

EXPERIENCE

AI-TRONICS Club, IIIT | Technical Member

August 2025 – Present

- Actively engaged in AI/ML discussions and applied technology projects within a developer community setting
- Collaborated with peers on technical problem-solving and knowledge-sharing sessions

JPMorgan Chase – Software Engineering Virtual Experience (Forage)

May 2025 – Aug 2025

- Built backend REST APIs in a simulated enterprise environment
- Worked with event-driven concepts and in-memory databases

PROJECTS

NutriGenAI | Android (Java), Python (ML), REST APIs, Firebase, UI/UX github.com/gitesh-goyal

- Built an end-to-end personalized diet planning system that generates meal recommendations using user goals, BMI, dietary preferences, and health constraints
- Designed a feature-driven recommendation pipeline combining domain rules with data-driven scoring to generate nutritionally balanced diet plans
- Implemented input feature engineering (BMI ranges, calorie targets, dietary constraints) to structure user data for recommendation logic
- Architected the system with clear separation of concerns (UI, recommendation logic, data layer) to support future ML model replacement without UI changes
- Built a production-ready Android UI with onboarding, profile setup, and real-time diet updates
- Documented system architecture and API design to support knowledge sharing and onboarding of new contributors

VisionSense | Python, OpenCV, MediaPipe, NumPy

github.com/gitesh-goyal

- Developed a real-time hand gesture recognition system using webcam video streams with low-latency inference
- Implemented landmark-based feature extraction from hand keypoints to classify gestures such as open palm, fist, heart, thumbs up, thumbs down and dynamic movements
- Designed a custom gesture classification logic on top of extracted spatial features rather than raw pixel inputs
- Optimized the inference pipeline to achieve 20–30 FPS real-time performance on consumer hardware
- Built an extensible gesture framework supporting confidence scoring and visual overlays for interpretability
- Built with modular, well-commented codebase — designed for demo and workshop use within developer community settings

ACHIEVEMENTS

- Recipient of Merit-Based Haldiram Scholarship, awarded a full tuition fee waiver for academic excellence
- Achieved 9.96 CGPA in first year, ranking among the top academic performers in the program
- Solved 150+ Data Structures & Algorithms problems across arrays, hashing, binary search, recursion, linked lists, trees, and basic graphs

- Completed JPMorgan Chase & Co. Software Engineering Virtual Experience, gaining exposure to backend APIs, event-driven concepts, and database interactions

TECHNICAL SKILLS

Languages	C++, C, Python, JavaScript
Web	React, Node.js, Express, HTML/CSS
Databases	MongoDB, MySQL, Firebase
Tools	Git, Android Studio, OpenCV, MediaPipe
